Subject: Microsoft Settlement

Dear Sir/Ma'am,

I am very very disappointed with the Microsoft settlement. Historically speaking a good argument can be made that Microsoft has been and continues to be the most damaging monopoly in the history of the United States. Microsoft has proven that it will not operate within the law and no organization on earth should know this better than your organization as Microsoft didn't even miss a step after signing previous agreements with your organization.

The job of the US Department of Justice is to enforce the Anti-trust laws. These laws were enacted for very very good reason. When these laws are not enforced something is taken away from all of us...the possibility to start and be successful in a business. Whoever made the decision to settle for an agreement that will have no effect whatsoever on Microsoft is stealing something from you and I and I don't like it at all.

Lastly, I want to know where the decision to give up came from. Was this decision from the President?

Regards,
